

Product Scope & Features

1. Product Scope

The Property Management Automation App is a comprehensive multi-role digital system that automates end-to-end property operations for owners, managers, and tenants. It covers onboarding, rent management, maintenance tracking, communication, and analytics, with support for mobile (Android + iOS) and web platforms.

In Scope (Full System)

1. Role-based access (Owner / Manager / Tenant / Admin).
2. Property, tenant, and lease lifecycle management.
3. Rent invoicing, tracking, and auto-reminders.
4. Online payment processing.
5. Maintenance request and service vendor management.
6. Document management (leases, IDs, inspection reports).
7. Analytics & financial reporting dashboards.
8. Notification engine (SMS, email, in-app).
9. Multi-property support.
10. Security, compliance, and backup infrastructure.

2. User Roles & Responsibilities

2.1 Property Owner

Purpose: Gain visibility and control over all owned properties and income.

Capabilities

1. View portfolio performance in real time.
2. Access tenant lists, payment histories, and upcoming renewals.
3. Receive automated monthly revenue and occupancy summaries.
4. View maintenance costs and vendor expenditures.
5. Download financial and performance reports.

2.2 Property Manager

Purpose: Operate, monitor, and maintain all property and tenant activities.

Capabilities

1. Add or remove tenants and assign units.
2. Configure rent schedules, payment amounts, and lease terms.
3. View payment status and outstanding balances.
4. Send or schedule rent reminders (SMS/email) - Could be automated.
5. Manage maintenance requests and vendor assignments.
6. Upload and manage documents (leases, receipts, photos).
7. Generate reports for owners and auditors.

2.3 Tenant

Purpose: Simplify rent payment, communication, and issue reporting.

Capabilities

1. View lease details and rent timeline.
2. Receive automated expiry and reminder notifications.
3. Pay rent online (Paystack integration).
4. Download digital receipts and invoices.
5. Update contact and profile information.

2.4 System Administrator

Purpose: Ensure stable operation, manage user roles, and handle escalations.

Capabilities

1. Manage all users and property records.
2. Control permissions and role assignments.
3. Monitor payment transactions and notifications.
4. Configure system settings (SMS gateway, Paystack API keys).
5. Generate platform-wide analytics and compliance reports.

3. Core Workflows

3.1 Rent Lifecycle

1. The manager creates a property and assigns a tenant.
2. System sets the rent cycle (start, expiry, amount).
3. Automated reminder sent before the due date.
4. Tenant pays through the Paystack payment gateway.
5. Receipt auto-generated and logged.
6. Owner and manager dashboards update instantly.

3.2 Notification Flow

1. **Rent expiry:** SMS + in-app + email alerts 1 month, 2 weeks, 1 week, 3 days before due, and then daily after.
2. **Payment confirmation:** SMS and email.
3. **Maintenance updates:** status alerts to the tenant and the manager.
4. **Monthly summary:** automated email to owners and managers.

3.3 Reporting Flow

1. Real-time dashboards for payments, arrears, and maintenance.
2. Exportable reports (PDF / Excel).
3. Automated scheduled reports are sent monthly to owners.

4. Feature Summary

Feature	Description	Primary Users
Dashboard & Analytics	Displays KPIs: rent due, paid, arrears, occupancy, maintenance status.	Manager, Admin
